

Transit Fee 1989-1990

QUESTION: To maintain and expand the campus's comprehensive transit program, shall the undergraduate and graduate students of UCSC increase the quarterly Student Transit Fee to the following levels for the next five years: 1990-91: \$25.00

1991-92: \$33.00

1992-93: \$35.00

1993-84: \$36.00

1994-95: \$36.00

and furthermore, shall there be a moratorium on further increases in the Student Transit Fee during the next five years?

DISCUSSION: This measure requires a simple majority of a minimum voting pool of 25% of the student body. This measure increases the level of combined support for the on-campus shuttle and the Santa Cruz Metro Transit District (SCMTD) student bus pass from the current \$21.25 per quarter to \$25.00 per quarter next year and increasing to \$36.00 per quarter by 1994-95. It also limits the student transit fee increases to only the amounts specified in this measure for the next five years through 1994-95.

If approved – the fee will provide for the maintenance of the campus transit system and permit the adoption of the five-year transit program developed by the Transit Oversight Committee.

If not approved – the fee will revert to the 1987-88 level of \$18.00 per quarter and the level of bus and/or shuttle service will be reduced accordingly. The fee reverts to \$18.00 per quarter in accordance with conditions imposed by the student referendum in the Spring of 1988.
